

UNDERSTANDING YOUR TREATMENT

Glow Protocol

A multi-peptide blend designed for comprehensive skin rejuvenation and dermal health.

- i** The Glow Protocol is a GHK-Cu-based cosmetic/dermal blend optimized for skin rejuvenation, collagen stimulation, and anti-aging effects. Core component GHK-Cu drives collagen/elastin synthesis and gene expression remodeling. May include complementary peptides or growth factors depending on formulation.

HOW IT WORKS

1**Type**

Multi-Peptide Blend

2**Composition**

BPC-157 10mg + TB-500 10mg + GHK-Cu 50mg

3**Target**

Skin rejuvenation & collagen

Talk to your prescriber about whether Glow Protocol may be right for you

This compound is available by prescription only

WHAT RESEARCHERS HAVE FOUND

GHK-Cu Collagen Synthesis

GHK-Cu has been shown to increase collagen production, improve skin elasticity, and accelerate wound healing in clinical and in-vitro studies.

Journal of Cosmetic Dermatology, 2015

QUESTIONS TO ASK YOUR PROVIDER

- ? What evidence level supports Glow Protocol (GHK-Cu Blend) for this patient's indication?
- ? What monitoring protocol should I establish?
- ? Are there contraindications or interactions to screen for?
- ? What is the recommended duration and cycling protocol?
- ? What is the current regulatory status?

IMPORTANT SAFETY INFO

- Injection site reactions are possible
- Individual component side effects may apply
- Not recommended during pregnancy
- Should be administered under physician supervision
- Store reconstituted vial refrigerated
